

INTERNATIONAL CONFERENCE

# CORPORATE GOVERNANCE: A SEARCH FOR ADVANCED STANDARDS IN THE WAKE OF CRISIS

MILAN, ITALY, MAY 08, 2014

## Conference concept

An economic crisis has shown lack of attention to crucial issues in governance business entities. Recommendations for corporate governance enforcement have been proposed by business community, society and regulators. However, risks, performance, reporting and corporate control issues are still under the discussion. With respect to this role of legal environment in establishing appropriate solutions for corporate governance effectiveness is relevant. It is clear that corporate governance enforcement and other legal issues is an increasingly important area of focus and substantial discussion should be arranged. Understanding that real business conditions can differ from theoretical models proposed by science, that's why it's important to form a platform for practitioners and theorists to outline main challenges and prospective solutions for improving corporate governance world.
