ETHICAL PRACTICES IN THE CORPORATE WORLD: NEED FOR REGULATION 91

Kuber Bhola, Reema Malhotra

This paper attempts to raise some of these critiques of the CSR model, as exemplified by some leading IT companies in India. We aim to highlight the emergent need of a systemic regulation and assessment of these ethical measures. Bringing ethics into the mainstream by establishing regulatory mandates and systematizing norms of execution of CSR protocols remains central to our work.

CORPORATE MUNICIPAL GOVERNANCE FOR EFFECTIVE AND EFFICIENT PUBLIC SERVICE DELIVERY IN SOUTH AFRICA 98

Paulin Mbecke

The research reviews the King III and literature to ascertain the lack of research on corporate governance in local governments in South Africa. Considering the particular set-up of local governments, the research doubts the successful application of King III in local governments. Through critical research theory, the current service delivery crisis in local governments in South Africa is described.

IS WAGNER'S THEORY RELEVANT IN EXPLAINING HEALTH EXPENDITURE DYNAMICS IN BOTSWANA? 107

Kunofiwa Tsaurai

This study tests the relevance of the Wagner's theory in explaining the health expenditure in Botswana. There is no consensus yet when it comes to the causality relationship between health expenditure and economy. At the moment, there are four dominant schools of thought explaining the causality relationship between health expenditure and economy.

REMITTANCES, FINANCIAL DEVELOPMENT AND ECONOMIC GROWTH: EMPIRICAL EVIDENCE FROM LESOTHO 116

Athenia Bongani Sibindi

In this article we investigate the causal relationship between the remittances, financial development and economic growth in Lesotho for the period 1975 to 2010. We make use of per capita remittances, real per capita broad money supply and real per capita growth domestic product as the proxies for remittances, financial development and economic growth respectively. We then test for cointegration amongst the variables by applying the Johansen procedure and then test for Granger causality based on the vector error correction model (VECM). Our results confirm the existence of at least one cointegrating relationship and also indicate that the direction of causality runs from remittances to the economy without feedback.

A CONCEPTUAL ANALYSIS OF THE ROLE OF COMPETITIVE INTELLIGENCE IN ZIMBABWE'S BANKING SECTOR 125

Alexander Maune

This article aims to provide a conceptual framework and analysis of the role of competitive intelligence in Zimbabwe's banking sector. The article used literature and conceptual research approach. Literature review has shown the concept of competitive intelligence to be multidimensional, with a multitude of varying definitions, as well as multifaceted and fuzzy. The concept of competitive intelligence has been presented variously as a process, a function, a product or a mix of all three. Literature review has also shown numerous intelligence concepts that are linked to the concept of competitive intelligence.

COMPARISON OF RISK MANAGEMENT REGULATION FROM A CORPORATE GOVERNANCE PERSPECTIVE WITHIN THE GERMAN AND UNITED STATES LEGAL AREAS 138

Remmer Sassen

Risk management is one of the main corporate governance components or management tasks. This paper details a comparison of risk management regulation from a corporate governance perspective of listed stock corporations in Germany and the United States (U.S.). Obviously, there are differences and commonalities between the national legal norms and the regulatory levels of risk management in both countries. The comparison helps to understand different traditions and practices in terms of how significant corporate governance rules are for risk management. Therefore, this article intends to inspire future research on the regulation of risk management across different regions and explore the relevance of national interests in the regulation of risk management. A principal finding of the comparison is that the U.S. corporate governance system seems to be more strongly regulated than the German system. This results from the powerful and coordinating role of the U.S. Securities and Exchange Commission (SEC). Thus, the seemingly more liberal system of non-binding standards in the U.S. has a higher impact on the regulation of risk management than in Germany.

A CONCEPTUAL DISCUSSION ON 'PATH DEPENDENCE' AND 'DEMAND FOR RETURNS' ARGUMENTS: PRIVATE ENTERPRISE VERSUS SOE PERFORMANCE 149

Malla Praveen Bhasa

Author attempts at discussing the relevance of path dependence in enterprise behavior and supplements it with the 'demand for returns' argument which posits that private enterprises stand to perform better as against state-owned enterprises as a result of the stakeholders' demand for their rightful share of value.

HARMONIZING INTELLIGENCE TERMINOLOGIES IN BUSINESS: LITERATURE REVIEW 156

Sivave Mashingaidze

The principal objective of this article is to do a literature review of different intelligence terminology with the aim of establishing the common attributes and differences, and to propose a universal and comprehensive definition of intelligence for common understanding amongst users.

STRATEGIC RESTRUCTURING FOR EFFECTIVE POLICE SYSTEM IN NIGERIA 163

Ann I. Ogbo, O. Obi-AnikeHappiness, E.K. Agbaeze, Wilfred I. Ukpere

The study aims to unravel the possible ways of positioning the Nigerian Police force for effective service delivery through strategic restructuring.
